New Zealand

Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report

Approved By:

Joseph Carroll, Agricultural Counselor

Prepared By:

Vinita Sharma, Marketing Assistant

Report Highlights:

This report provides a broad overview of export certificate requirements for a representative sample of products exported to New Zealand. All sections of this report have been reviewed and updated to reflect New Zealand's most recent requirements. However, as these regulations are constantly updated, exporters interested in exporting to New Zealand are encouraged to check relevant websites for the most up-to-date information.

Sections update: All sections have been revised or updated.

Section I. List of All Export Certificates Required By Government

Summary

In July 2011, Ministry of Fisheries merged with Ministry of Agriculture (MAF) to support New Zealand's primary sector. MAF's two organizations - Biosecurity New Zealand (BNZ) and the New Zealand Food Safety Authority (NZFSA) are the two key organizations that regulate food imported into New Zealand. Both organizations fall under the umbrella of the Ministry of Agriculture and Forestry (MAF).

[Biosecurity New Zealand](#) has the lead role in biosecurity protection (e.g. preventing unwanted pests and diseases being imported into New Zealand, and controlling, managing or eradicating them should they arrive).

New Zealand has strict biosecurity rules and most unprocessed products cannot be imported into New Zealand unless an import health standard has been developed. New Zealand defines biosecurity as "the exclusion, eradication or effective management of risks posed by pests and diseases to the economy, environment and human health." New Zealand's biosecurity requirements cover terrestrial, freshwater and marine environments. Import health standards specify the biosecurity requirements that must be met for trade to occur.

In New Zealand, import health standards are based upon risk analyses, which assess either a commodity or a pest/pathway combination. Biosecurity New Zealand takes legislative requirements and international obligations into account when conducting risk analyses and developing import health standards. The principal document for all New Zealand import health standards is the Biosecurity Act (1993). The act provides for management of risks associated with imported goods such as produce, seeds and plants principally through import health standards. New Zealand also adheres to the guidelines on risk analysis developed under the auspices of the Interim Commission on Phytosanitary Measures operating within the framework of the International Plant Protection Convention, and the World Trade Organization Agreement on the Application of Sanitary and Phytosanitary Measures. Information on import health standards for specific products can be found <http://www.biosecurity.govt.nz/ihs/search>.

The [New Zealand Food Safety Authority](#) (NZFSA) sets policies, criteria and procedures to monitor the safety of imported food for human consumption. NZFSA was a semi-autonomous body attached to Ministry of Agriculture (MAF). In July 2010, Ministry of Agriculture and the New Zealand Food Safety Authority amalgamated to form a single organization. NZFSA maintains generic clearance procedures for all foods imported into New Zealand. If an imported product is of regulatory interest to NZFSA, it will likely require exporters to comply with additional specific import procedures and associated requirements. These requirements are set down in the Imported Food Requirements (IFRs). Examples of products that fall under these requirements include bovine meat products, fish products, shell fish, dairy products, nuts, spices etc., as these food products pose more of a potential risk to public health. A list of IFR products can be found at: <http://www.nzfsa.govt.nz/importing/import-requirements-for-specific-foods/>

Export Certification Requirements

The table below provides export certificate requirements for many products exported to New Zealand from the United States.

Export Certificates and Attestations Required by New Zealand				
Products	Title of Certificate	Attestation Required on Certificate	Purpose	Requested By
Peanuts	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand if packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required. Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.	Biosecurity	BNZ www.biosecurity.govt.nz
	Certificate of analysis from USDA or a State Department of Agriculture required	Consignments are tested at intervals depending on the frequency of import. In all cases, a certificate of analysis is required for each consignment. Please check NZFSA requirement at Imported Food Products - Peanuts and Pistachios	Peanuts are considered a high risk food because they have been found to contain mycotoxins, mold and insects.	NZFSA www.nzfsa.govt.nz
Roasted/ Salted Pistachios	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand if packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required. Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.	Biosecurity	BNZ www.biosecurity.govt.nz
	Certificate of analysis from USDA or a State Department of Agriculture required	Consignments are tested at intervals depending on the frequency of import. In all cases, a certificate of analysis is required for each consignment. Please check	Pistachios are considered a high risk food because they have been found to	NZFSA www.nzfsa.govt.nz

		NZFSA requirement at Imported Food Products - Peanuts and Pistachios	contain mycotoxins, mold & insects.	
Walnuts, Pecans, Almonds	No phytosanitary certificate required	<p>No certification or inspection required by Biosecurity New Zealand, if packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required.</p> <p>Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.</p>	Biosecurity	<p>BNZ</p> <p>www.biosecurity.govt.nz</p>
Dried Fruits	No phytosanitary certificate required	<p>There are no certification or inspection requirements for dried, freeze dried, dehydrated or flaked fruit and vegetables that are commercially manufactured or produced and listed in the Plants Biosecurity Index database, except for those that may have seeds that are entered as “Entry Prohibited” and those listed in sections 9.3, 9.4 and 9.7 of the Stored products for Human Consumption import health standard.</p>	Biosecurity	<p>BNZ</p> <p>www.biosecurity.govt.nz</p>
Stone Fruits (California Nectarines and Peaches)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) required	Please see section 6.1.4 of the Fresh Peach and Nectarine from California import health standard regarding phytosanitary certificate requirements.	Biosecurity	<p>BNZ</p> <p>www.biosecurity.govt.nz</p>
	Additional declarations are required on the phytosanitary certificate	<p>APHIS must provide the additional declarations to the phytosanitary certificate:</p> <p>"The peaches and nectarines in this consignment have:</p> <ul style="list-style-type: none"> - been inspected in accordance with appropriate official procedures and found to be free of any visually detectable regulated pests specified by the New Zealand Ministry of Agriculture and Forestry. 		

		<p>AND</p> <ul style="list-style-type: none"> - been treated in accordance with Appendix 1(b) of the Workplan between NZ MAF and APHIS, USDA. <p>AND</p> <ul style="list-style-type: none"> - undergone appropriate pest control activities that are effective against those Risk group 2 regulated pests specified by NZ MAF. <p>OR</p> <ul style="list-style-type: none"> been sourced from an area free (verified by an official detection survey) from those Risk group 2 regulated pests specified by NZ MAF." <p>Please check section 6.1.5 of the Fresh Peach and Nectarine from California import health standard for the most recent requirements.</p>		
Table Grapes (State of California)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	Please see section 6.1.5 of the import health standard on Table Grapes from the State of California for information on phytosanitary requirements.	Biosecurity	BNZ www.biosecurity.govt.nz
	Additional declarations required on the phytosanitary certificate	<p>APHIS must provide the following additional declarations to the phytosanitary certificates:</p> <p>(i) This is to certify that the table grapes described herein have been inspected according to appropriate official procedures and are considered to be free from the quarantine pests specified by New Zealand MAF and to conform with the current phytosanitary requirements of New Zealand MAF, including those for regulated non-quarantine pests; AND</p> <p>(ii) The table grapes in this consignment have been treated in accordance with Appendix 1(b) of the Workplan between NZ MAF and USDA APHIS.</p> <p>(iii) from the United States of America. treated in</p>		

		<p>accordance with the measures specified by MAF Biosecurity New Zealand for the access of host material of <i>Drosophila suzukii</i>.</p> <p>Please check section 6.1.5 of the Table Grapes from the State of California import health standard for the most recent requirements.</p>		
Cherries (State of California)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	<p>Please see section 4.1 of the import health standard on Fresh Fruit and Vegetables for information on phytosanitary requirements.</p>	Biosecurity	MAF Biosecurity New Zealand
	Additional declarations required on the phytosanitary certificate	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The cherries in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Monilinia fructigena</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Monilinia fructigena</i> AND</p> <p>(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly</p> <p>Please see page 372 of the import health standard on Fresh Fruit and Vegetables</p>		

		for information on additional declaration on phytosanitary certificate		
Cherries - <i>Prunus avium</i> (States of Washington, Oregon and Idaho)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) required	Please see section 6.1.5 of the import health standard on Cherries Pacific North-West for information on phytosanitary requirements.	Biosecurity	
	Additional declarations on the phytosanitary certificate required	APHIS must also provide the following additional declarations: (i) This is to certify that the cherries described herein have been inspected according to appropriate official procedures and are considered to be free from the quarantine pests specified by New Zealand MAF and to conform with the current phytosanitary requirements of New Zealand MAF, including those for regulated non-quarantine pests.; (ii) This is to certify that the cherries in this consignment have undergone appropriate pest control activities that are effective against those regulated high impact pests specified by NZ MAF. Please see section 6.1.6 of the import health standard on Cherries Pacific North-West for information on additional phytosanitary requirements.		
Fruits (Mandarin/ tangerine, orange, apricot, pears, plums)	Phytosanitary certificates issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) required for all fruit and vegetable consignments entering New	Please see section 2.1 and 2.2 of the import health standard on Fresh Fruit and Vegetables for information on phytosanitary certificates.	Biosecurity	

	Zealand			
	Additional declaration required on the phytosanitary certificate required – Mandarin/ Tangerine	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: Mandarins/tangerines in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Aleurocanthus woglumi</i> ; <i>Spiroplasma citri</i> [VO] ; <i>Xanthomonas campestris</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Aleurocanthus woglumi</i> ; <i>Spiroplasma citri</i> [VO]; <i>Xanthomonas campestris</i> AND</p> <p>(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 364 of Import Health Standard on Fresh Fruit and Vegetables for more information.</p>		
	Additional declaration required on the phytosanitary certificate are required – Orange	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The oranges in this consignment have:</p> <p>(i) been inspected in accordance with appropriate</p>		

		<p>official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Aleurocanthus woglumi</i>; <i>Bemisia tabaci</i> [strain] <i>Thrips palmi</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Aleurocanthus woglumi</i> <i>Bemisia tabaci</i> [strain] <i>Thrips palmi</i> AND</p> <p>(iii) treated in accordance with Appendix 1(b) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America</p> <p>Please see page 365 of Import Health Standard on Fresh Fruit and Vegetables for more information.</p>		
	<p>Additional declaration required on the phytosanitary certificate required – Apricot</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: Apricots in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Monilinia fructigena</i></p>		

		<p>OR been sourced from an area free (verified by an official detection survey) from: <i>Monilinia fructigena</i></p> <p>AND (iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 371 of Import Health Standard on Fresh Fruit and Vegetables for more information</p>		
	<p>Additional declaration required on the phytosanitary certificate are required – Plums</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The plums in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against: <i>Monilinia fructigena</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Monilinia fructigena</i> AND (iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection</p>		

		<p>Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 374 of Import Health Standard on Fresh Fruit and Vegetables for more information</p>		
	<p>Additional declaration required on the phytosanitary certificate required- Nectarine/Peach</p>	<p>The nectarines/peaches in this consignment have:</p> <ul style="list-style-type: none"> i. been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND ii. (ii) undergone appropriate pest control activities that are effective against those risk group 2 regulated pests specified by NZ MAF. OR <p>been sourced from an area free (verified by an official detection survey) from those risk group 2 regulated pests specified by NZ MAF. Note: Combinations of treatment and area freedom are permissible for the aforementioned RG2 pests. AND (iii) treated in accordance with Appendix 1 (b) of the Workplan between NZ MAF and APHIS, USDA.</p> <p>AND (vi) treated in accordance with the measures specified by MAF Biosecurity New Zealand for the access of host material of <i>Drosophila suzukii</i> from the United States of America.</p>		

	<p>Additional declaration required on the phytosanitary certificate are required – Pears (State of Washington)</p>	<p>The pears in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i> AND (iii) treated in accordance with Appendix 1(d) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see Import Health Standard on Pears from the State of Washington for more information.</p>		
	<p>Additional declaration required on the phytosanitary certificate required – Pears (State of California)</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The pears in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry.</p>		

		<p>AND (ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i> AND (iii) treated in accordance with Appendix 1(b) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see Import Health Standard on Pears from the State of California for more information.</p>

Grains/ Seeds for Human Con- sumption	Phyosanitary Certificate Additional declarations are required depending on the product Grains/Seed Analysis Certificate	U.S. exporters must meet certification requirements for individual products. Various options from pre-inspection certification to post-entry treatments are available under specific grain and seed categories. Each grain and seed product has different certification requirements. Please see Import Health Standard for Grains and Seeds and import regulations	Biosecurity	
Shelf Stable Pet Foods with Bovine Meat	No phytosanitary certificate required	Please see section 7.2 of the import health standard on Pet Food for information on canned/retorted pet foods containing beef/other bovine meat products/by-products and other animal products.	Biosecurity	
	Zoosanitary certificate required	Please see section 10 of the import health standard on Pet Food or a sample Zoosanitary certificate.		
Seeds for Sowing	Basic Requirements Phyosanitary certificate issued by APHIS required Additional declarations required depending on the type of seed Seed Analysis Certificate	Only species of seeds and plants (including bulbs, cuttings, and tissue cultures) listed in the New Zealand Biosecurity Plants Index can only be imported into New Zealand. All seed for sowing imported into New Zealand must meet the Basic requirements (section 2.2.2) of the Seeds for Sowing import health standard, as well as any specific requirements as indicated by the Biosecurity Index. Phyosanitary certificate is required certifying that seed for sowing has been inspected by USDA and found to be free of any visually detectable regulated pests, and conforms to New Zealand's current import requirements. For additional declaration, please see section 3.5 of the	Biosecurity	

		Import Health Standard of Seeds . Please see section 2.2.2.4 section of the Import Health Standard of Seeds for seed analysis certificate requirements		
Frozen Pig by- products	Zoosanitary certificate required.	Please see section 12 of Import Health Standard on Frozen Pig Meat for a sample Zoosanitary certificate.	Biosecurity	

Section II. Purpose of Specific Export Certificate(s)

See table in Section I.

Section III. Specific Attestations Required on Export Certificate(s)

Please refer to the Table under Section I, for required attestations and the Biosecurity New Zealand website for specific information on IHSs and attestation requirements.

<http://www.biosecurity.govt.nz/ihs/search>

Section IV. Government Certificate's Legal Entry Requirements

Entry requirements are set out on the Import Health Standards.

Original documents relating to the shipment must accompany each shipment. Most certificates are valid for one shipment only and are required to be issued by APHIS, USDA.

Section V. Other Certification/Accreditation Requirements

U.S. exporter are required to meet both biosecurity and food safety requirements. For more information on New Zealand's food safety requirements, please visit www.nzfsa.govt.nz. Please also refer to the FAS/Wellington report entitled Food and Agricultural Import Regulations & Standards which can be found at:

<http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx>.

Laboratory Report of Analysis

Account No.	Date Received	Date Completed	Lab Number
2077	09/06/05	09/07/05	5-1790
Sender's Information*			
Product/Variety	VNS		
Brand	Chickpea		
Genus/Species	Cicer arietinum		
Lot Number	BHL3775/ARL		
Class	Official	44092 lbs	800 bags

*The information provided herein is that of the sender and not of the laboratory.

Viability Analysis				
Germ Date	Germination %	Dormant %	Hard %	Total Viable
Chickpea	-N-	-N-	-N-	-N-
Cicer arietinum	-N-	-N-	-N-	-N-

Other Determinations

Phyto exam 501.8 Grams
Soil exam 501.8 Grams

No injurious pest, disease or soil found.
The seed in this lot was examined by the Washington State Department of Agriculture - Seed Program and found to be free of weed seeds as specified by MAP in the "Schedule of Regulated Weeds".

Remarks: None.

Remarks

Analyzed using AOSA rules as a guideline.
Officially sampled by the Federal Grain Inspection Service.

Tests Requested: Phyto exam, Soil exam. No other tests requested.

WARRANTY: We warrant that the test results reported on this report have been obtained by using AOSA approved testing methods and equipment. Test results reflect the condition of a laboratory sample and may not reflect the condition of the seed lot from which the sample was taken. Officially drawn samples represent the condition of the lot at the time of sampling.
DISCLAIMER OF WARRANTIES: WE MAKE NO OTHER WARRANTIES OF ANY KIND, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
